
R5A2A4 — NK_R / ZCCHC2 source-LD and multi-signal adjudication
A Marginal NK_R / ZCCHC2 cis-eQTL
source permutation q = 0.383
0 variants pass local threshold
within-window Bonferroni
source top eQTL
rs7239261
−log10 (P)
GRCh37 position (Mb)
B Source LD after PF10 covariate residualization
lead–top r2 = 0.0124
LD with 18:60243208
LD with rs7239261
r2
GRCh37 position (Mb)
C Forced conditioning on the source top eQTL
rs7239261 conditional P = 0.0177
0 residual variants pass local threshold
−log10 (Pconditional)
GRCh37 position (Mb)
D SuSiE-RSS PIP (PF10, L=10)
max PIP = 0.0296; rs7239261 = 0.00665
95% credible sets = 0
Posterior inclusion probability
GRCh37 position (Mb)
