IL12RB2 receives bounded external disease and chromatin support

a) **FinnGen R13 × OneK NK/IL12RB2**

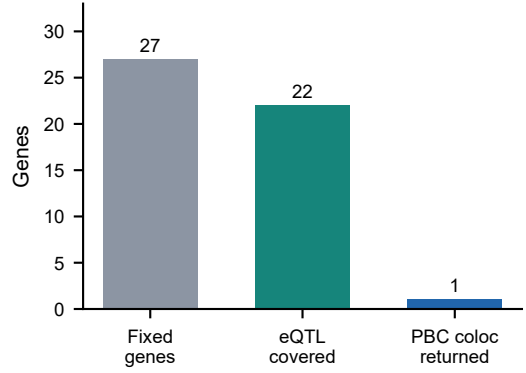

b) **Source credible-set membership**

2/2 OneK QTL CS variants occur in the 17-member FinnGen R13 disease CS

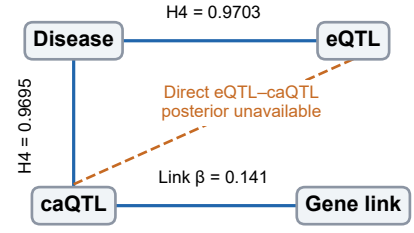

rs6679356	PIP 0.324	Included
rs6702599	PIP 0.675	Included

CS membership supports signal compatibility, not a unique causal variant or mediation.

c) **Fixed CASCADE query defines coverage**

d) **Observed edges do not establish mediation**

Links have no causal direction
