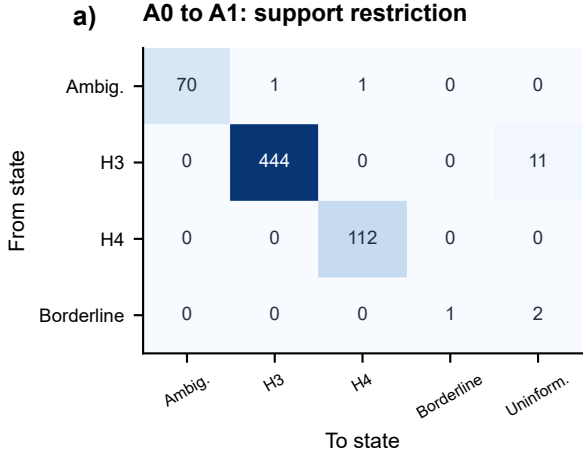
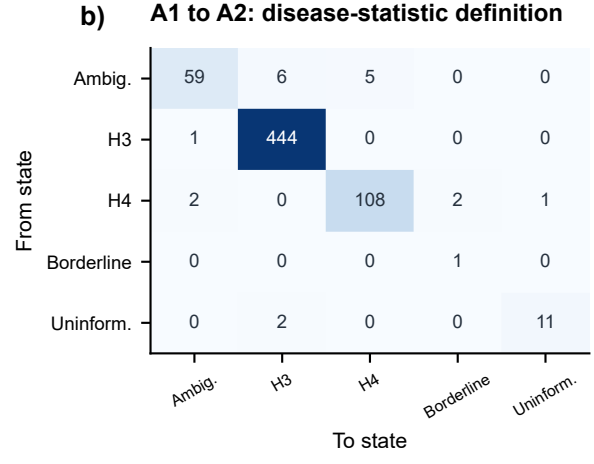
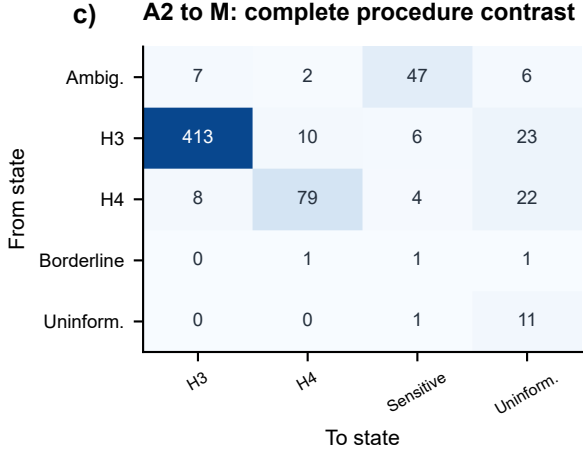
Complete adjacent-arm transitions in the frozen 642







d) Audit units retain distinct identities

14 targeted comparison-model identity rows
= 7 comparisons × 2 factor models

2,568 SuSiE fit rows
= 642 comparisons × 4 configurations

2,568 kriging diagnostic units
= 642 comparisons × 2 models × 2 traits

Equal counts do not imply equal objects.
One reviewed kriging variant was outside CSs.
