

# IL12RB2–NK is supported across molecular-QTL resources within bounded causal claims

PBC risk allele associated with higher IL12RB2 expression

Directionally concordant association; not a mediation estimate

Peak-gene link  $\beta=0.141$ ; caQTL q approx.  $10^{-13}$  to  $10^{-15}$

Anchor is not in the peak caQTL credible set

Positional chromatin support; complete variant-level cascade not established
