A bounded PBC screen with an explicit input contract

a) Screen and follow-up

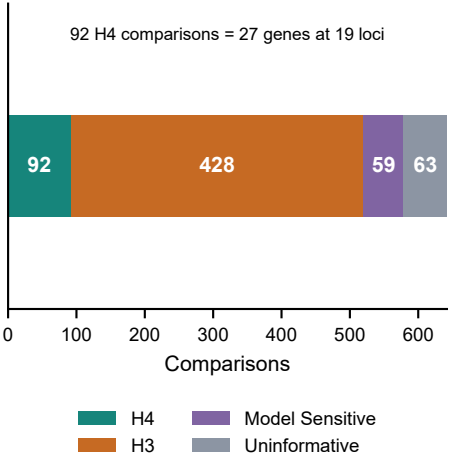

1,463 coverage-insufficient; not negative

b) Four arms distinguish input changes

Arm	Support	Disease	Procedure
A0	S_A	GCST	ABF
A1	S_M	GCST	ABF
A2	S_M	GJOKA z	ABF
M	S_M	GJOKA z	Multi-signal

A2 versus M compares complete procedures, not only the number of causal variants.

c) Frozen PF10 outcomes

d) Prespecified cohorts remain separate
